

4. Upgrade Kit to Four Cylinders

Clesse - Europe's leading manufacturer of uncompromised quality single and auto change cylinder regulators designs for over 20 years for one, two and four cylinders including OPSO protection. Used with the pre-assembled hose with direct compression connection, the modern holiday home will be well served with over 50kW of gas supply and a reputation for reliability, quality and ease of use. The optional test point provides the engineer with a convenient place for soundness and performance checking of gas appliances.
